FEATURES & BENEFITS

- Benefitting from a larger diffuser, this profile can allow for wide-angle light dispersion when coupled with a suitable LED tape. Thanks to a clever baseplate, the profile slides in and leaves a convenient space below for cable management and any mounting screws to be drilled through.

- These channels can help to create sleek and completely bespoke LED strip lighting installations and each is available with either an opal, semi-clear or clear diffuser

- Suitable for both dry and damp locations.

- Available in bespoke lengths.
