FEATURES & BENEFITS

- Our waterproof aluminium extrusion channel for LED tape measuring 16x16mm. This channel works by using an inner metal spine inserted into a plastic outer body which works to eliminate water ingress.
- Simply lay the LED tape onto the Aluminium spine and insert into the channel, then use the provided end caps to seal the ends. We suggest using a further silicone glue coating inside and out.
- Suitable for both dry and damp locations.
- Available in bespoke lengths.
