DESCRIPTION

LED Neon flex is a flexible light tube designed to produce an ambient linear lighting effect and is perfect for single use display lighting. PVC totally diffused, 'no shadow' no spots and flexible.

It's durable IP65 body allows for installations both in and outdoors where light water exposure may occur. Pair with one of our RGB controllers for colour changing effects.

Neon Flex looks better than glass neon - and it opens all the environments where fragile Glass Neon cannot be used. As the name suggests, it is highly flexible. LED Neon Flex can be bent to a minimum radius of 4 cm, and can be cut easily to your desired lengths. Maximum Length at any time is 12 metres.

All our neon flex comes with a 1 year guarantee as standard on indoor installations (1 year guarantee for outdoor installations).

For a working Neon Flex installation you will need:

- Neon Flex LED
- 1 x Neon Flex Power Cable
- 1 x Neon Flex Connector Pin
- 1 x Neon Flex End Cap
- 1 x 24V Power Supply
