FEATURES & BENEFITS

- Featuring a 80 CRI spot free light, LED Neon Flex Mini is a compact light tube designed to produce an ambient linear lighting effect. At only 10 x 15mm its small size and light weight make it ideal for slimline single use display applications both indoors and outdoors.
- High quality, high brightness
- Suitable for indoor and outdoor use

## DESCRIPTION

LED Neon Flex Mini is a new compact version of our Neon Flex tube lighting, at only 15 x 10mm its small size and light weight it is ideal for slimline single use display applications both indoors and outdoors.

It's durable IP65 body allows for installations both in and outdoors where light water exposure may occur. As the name suggests, it is highly flexible and can be bent to a minimum radius of 2 cm, and can be cut easily to your desired lengths. Maximum Length at any time is 10 metres.

Neon flex can be used in some instances to replicate traditional neon where fragile glass isn't suitable. Neon flex can be run in up to 11 metres using a 24v LED driver. The neon flex is supplied in a 50m drum but we can cut and supply per meter in customised lengths. This domed neon flex is 10mm x 15mm high. Fully dimmable using a dimmable led power supply.

**For a working Neon Flex installation you will need:**

- Neon Flex LED
- 1 x Neon Flex Power Cable
- 1 x Neon Flex Connector Pin
- 1 x Neon Flex End Cap
- 1 x 24V Power Supply
