

SENSOR - PIR RECESSED/SURFACE

Our PIR Motion switch is a none adjustable timed switch ideally used with our Sydeo System without the need for any soldering!

Detection length is aproximately 3 to 5 metres, the lights will stay on for 30 seconds before switching off again.

Connect directy to the Sydeo Driver's main port to control all your lights.

Voltage	DC 12V/24V
Working temperature	-20°C~+50°C
Standby Current	17uA
Load power	<40W
Output Mode	PIR sensor, inductive output
Delay time	30s
Sensing Method	Passive
Detection distance	3-5m
Detection range	Horizontal 130° , vertical 100°
Weight	40g
Warranty	2 years
